Dear Parent or Guardian:

To make sure your child is ready for school, California law, *Education Code* Section 49452.8, now requires that your child have an oral health assessment (dental check-up) **by May 31** in either **kindergarten** or first grade, whichever is his or her first year in public school. Assessments that have happened within the 12 months before your child enters school also meet this requirement. The law specifies that the assessment must be done by a licensed dentist or other licensed or registered dental health professional.

Take the attached Oral Health Assessment/Waiver Request form to the dental office, as it will be needed for your child's check-up.

If you do not already have a regular dentist for your child, we recommend that you use this oral health assessment as a way to establish a regular check up schedule. We also realize that access to a regular dentist is not always possible. The dental hygienists with the Calaveras Children's Dental Project are licensed dental professionals and are qualified to perform this assessment. If you have already signed your child up to receive a dental screening or dental cleaning from the Children's Dental Project as part of the classroom Smile Keepers program, your child will automatically receive this assessment. If you are not sure whether your child's class is part of Smile Keepers, or if you signed him or her up, please check with your child's teacher. If you cannot take your child for this required assessment, or chose not to participate in the Smile Keepers program, please indicate the reason for this in Section 3 of the form. California law requires schools to maintain the privacy of students' health information. Your child's identity will not be associated with any report produced as a result of this requirement.

Remember, your child is not healthy and ready for school if he or she has poor dental health! Many things influence a child's progress and success in school, including health. Children must be healthy to learn, and children with cavities are not healthy. Cavities are preventable, but they affect more children than any other chronic disease.

Baby teeth are very important. They are not just teeth that will fall out. Children need their teeth to eat properly, talk, smile, and feel good about themselves. Children with cavities may have difficulty eating, stop smiling, and have problems paying attention and learning at school. Tooth decay is an infection that does not heal and can be painful if left without treatment. If cavities are not treated, children can become sick enough to require emergency room treatment, and their adult teeth may be permanently damaged.

If you have questions about the new oral health assessment requirement, please contact the school office or district nurse at 754-2322.

Sincerely,

Belinda Brager, RN, PHN, MSN
CUSD District Nurse
